

TECHNICAL DATA SHEET

MALCO® LEATHER CONDITIONER (1099)

DESCRIPTION

Leather Conditioner cleans and conditions all leather surfaces. This non-greasy formula can be used to both remove soils from leather and to revive tired or hardened leather back to its original feel.

DIRECTIONS

Test on an inconspicuous area first to check for any appearance change. Apply directly onto leather and wipe into surface with a soft, clean cloth. For seams and trim, use a detail brush to lift dust, dirt and debris from any hard-to-reach areas prior to applying. Add more product to increase the size of the treatment area. After complete coverage has been achieved, wipe off any excess material.

FEATURES AND BENEFITS

Natural moisturizes soften, restore and protect	Revives tired and hardened leather back to its original feel
Non-greasy formula	Cleans and conditions all leather surfaces
VOC Compliant	Great leather scent
