

MALCO® EPIC™ REVIVE NU (1998) TRIM & CLADDING RESTORER

DESCRIPTION

EPIC Revive Nu is a complimentary product in the EPIC™ family designed to restore and enhance most OEM and ABS types of molding, trim, cladding and other automotive plastic. This product restores faded and dried out plastic to the original satin finish, while lasting much longer than traditional dressings. This engineered formula penetrates and bonds with most types of factory molded plastic and is easy to use.

DIRECTIONS

Wash and dry vehicle and pull inside or into the shade. Thoroughly clean the plastic with EPIC™ Final Prep Wipe (1097) to remove any waxes or contaminants. Shake the bottle before using. Apply a small amount of EPIC Revive Nu to a clean microfiber applicator pad and work into the plastic. A thin even coating is recommended for OEM restoration and a satin finish. For a glossier finish apply more liberally or use two coats to achieve desired finish.

FEATURES AND BENEFITS

Lasts up to one year, even with frequent washing	Restores OEM plastic to like-new appearance
Bonds with black and gray plastic to provide a longer durability	Easy mess free application allows for variable gloss
